THE PRESIDENT OF KAIROS TECHNOLOGIES ABOUT RESULTS OF THE COMPANY'S ACTIVITY IN 2015

MICHEL VIEIRA

LADIES AND GENTLEMEN!

2015 was a difficult one not only for Kairos Technologies, but for the whole IT market. Nevertheless, our Company managed not only to maintain but also to consolidate the positive dynamics of development, as evidenced by the steady growth of all key financial Kairos Technologies indicators in 2015.

Deeply thought and thoroughly planned strategy of activity of the Company in 2015 that takes into account various possible risks in the implementation of assigned tasks within the specified period, helped to successfully overcome all the difficulties and operational issues, helped to consolidate the team into a cohesive team ready to solve any tasks and challenges of the IT market. It is an impressive success, which was achieved thanks to the staff, leaders and partners.

Mastering of new IT markets, particularly in the Asia-Pacific direction, to a large extent, contributed to the expansion of the KairosPlanet Distributed Computing Network, which has more than 60 thousand of Participants at the beginning of 2016!

In 2016, the priorities of Kairos Technologies remain unchanged – an absolute guarantee of safety and reliability of customer service, maximum coverage range of safe storage, data transmission and operation in KairosPlanet Distributed Computing System.

Individual approach to corporate and private clients, provision of a wide range of high-quality services, long-term partnership strategy, a stable income and total responsibility to comply with all contractual obligations confirmed high business reputation Kairos Technologies as a reliable business partner.

Successful promotion of the Kairos Technologies product line, a number of innovations and a wide range of services - all of this helped to ensure a high ranking in the IT-security market.

2015 confirmed the relevance and demand for Kairos Technologies and services in the IT-market. Thus, the main tactical tasks of the Company is the preservation and increase the demand for the market of IT-technologies and security services by providing customers and partners with the most competitive, innovative and affordable products and services to the global IT-security market.

The pursuit to the highest level of safety and reliability is the secret to the success of Kairos Technologies.

MARKETING DIRECTOR OF KAIROS TECHNOLOGIES COMPANY

OTOKAR KASYNETS

DEAR FRIENDS! DEAR COLLEAGUES!

It would be difficult for me to add something to the appeal of the President of our Company, as it reflects virtually all aspects and also my work. But I will try. Noblesse oblige.

Thus, to the circle of my main responsibilities include, first of all, the marketing component, which is covering all aspects of strategic planning, methods of working with Participants, advertising activities, analysis of the situation on the market and the continuous monitoring of the ongoing work of the Company in order to enhance its competitiveness in the market of IT-technology and security.

As you can imagine, in my work are the place to be not only "working points" (rightly mentioned by Mr. President in his report), but also frankly problematic issues. The fact that almost all of them were successfully solved (and are solving, because the issues arise constantly, which is quite natural), is in many aspects merit of a team of the professionals and clear, carefully developed mechanism of interaction of all levels of staff and management of the Company – the mechanism, that proved its effectiveness and viability for nearly 2 years.

Indeed, 2015 was not easy for Kairos Technologies. Much of what we have planned, we have not yet managed to implement. However, in the first place, it was not because of the lack of funding or internal factors, but rather because of the needs of the market, which are dictating their priorities and are requiring rapid modernization of existing software products and services. Therefore, some aspects of the 2015 strategy, which have been associated with the

development of new directions, we have reserved for 2016.

The Company's activity was originally built to protect the interests of our customers and Participants. It allowed expanding considerably the composition and geography of the KairosPlanet Distributed Computing Network. An important role is also played by competent marketing strategy.

The most important stimulus for the whole team Kairos Technologies in 2015 was an awareness of the importance of the Company for the members of the IT market. Positive results are always pleasing and inspire to conquer new horizons.

Demand dictates the offer. In this sense, the demand for Kairos Technologies products and services in 2015 exceeded even our most optimistic expectations of marketing. This could not but rejoice.

All this was made possible, in particular, thanks to the efforts of our leaders, who in the process of joint cooperation with Kairos Technologies have mastered new heights in their professional and career development, and this has caused impressive results.

Analysis of successful work in the Kairos Technologies gives me every reason to look forward with confidence. And I believe that my modest contribution to the work of Kairos Technologies will allow further position the Company in the market as a successful, dynamic and open to mutually beneficial business cooperation.

PARTICIPATION IN THE INTERNATIONAL CONGRESSES

The Company is a permanent generator of the latest achievements in the field of IT - technology and security. Representatives of the Company are regular participants of international symposia and conferences, dedicated to these areas. In 2015, our employees were participants and speakers at the following events:

OUR "LEADERS OF THE YEAR"

2015 opened for the KairosPlanet project series of dynamically developed teams headed by real leaders - not only on status, but in essence!

First of all we would like to commend the work of the Hungarian branch of the KairosPlanet, which is led by Kochne Szikra Zsuzsa.

Their work is characterized by innovation and imbued with the spirit of camaraderie and support that helped them achieve impressive results growing affiliate network! For them, 2015 was the fundamental year. Hungarian team was able to build 6 separate lines of leadership. Thanks to this in November Kochne Szikra Zsuzsa reached the Executive career level. The Slovak branch of the project, which is led by Katerina Ondreiko is developing in the same dynamic way.

We would also like to note partners in Germany, whose work is characterized by reliable and stable growth. All the affiliate structure showed a strong expansion of the geography and the significant increase in the Participants!

During the whole 2015 was conducted a large number of leadership activities on a global level such as the International Kairos Technologies Partners Congresses in the United Arab Emirates and Turkey, as well as many different regional events. Participants affiliate networks have been with the Company since its first webinar and to the creation of a whole series of training webinars!
